

# Provident Trust Strategy Fund (PROVX)

## Quarterly Review – December 31, 2022

**Investment Objective** - Seeks long-term growth of capital by investing mainly in a limited number of multi-capitalization growth stocks.

**Manager** - The Provident Trust Strategy Fund (the “Fund”) is advised by Provident Trust Company (“Provident”) of Waukesha, WI. Provident was founded in 1999 and is controlled by the principals of the firm.

**Investment Professionals** – J. Scott Harkness, CFA, Chairman and CEO of Provident, is responsible for the day-to-day management of the Fund.

**Strategy** - Provident is a concentrated core growth equity manager seeking to exceed the S&P 500 index return over full investment cycles. (A typical investment cycle last 5-7 years and includes both a 30% advance and a 20% decline.) The Fund can flexibly allocate assets between stocks, bonds and money markets to moderate volatility, and selects common stocks of all market capitalizations. Stock selection criteria include improving revenue and earnings growth, increasing margins, significant management stock ownership, and upward valuation potential. The Fund is a non-diversified investment company; please see the prospectus for further details.

**Manager Commentary** – Provident Trust Strategy Fund (PROVX) gained +2.97% vs. the S&P 500’s +7.56% for the quarter ended December 31, 2022. During Provident’s tenure as portfolio manager (beginning September 9, 2002), PROVX gained +564.25% cumulatively with an 80% average month-end allocation to equities vs. +535.54% for the always fully invested S&P 500. Top performers for the quarter ended 12/31/22 were The Charles Schwab Corp., Visa, Inc. and Home Depot, Inc. while Costco Wholesale Corp., Southwest Airlines Co. and Alphabet, Inc. (Class A&C) underperformed. We forecast 2023 real GDP +1.5%, +3% inflation, +3 – 5% 10-year Treasury yield, and a 0 +20% S&P 500 return, including one or more 10%+ intra-year declines. During the quarter we initiated new positions in Southwest Airlines and TJX Companies and decreased our Alphabet Cl. A&C, Charles Schwab, and UnitedHealth Group holdings.

# Provident Trust Strategy Fund (PROVX)

## Quarterly Review – December 31, 2022

**S&P 500 Index:** An unmanaged index, consisting of 500 selected common stocks, commonly used to measure the performance of U.S. stocks. An investment cannot be made directly in an index.

**P/E ratio (trailing one year):** The weighted average of the price/earnings ratios of the stocks in the Fund's portfolio based on the previous 12 months of earnings per share.

**P/E ratio (forward 1 year):** The weighted average price/earnings ratios of the stocks in the Fund's portfolio using forecasted earnings for the following twelve months. Forecasted earnings are just an estimate and are not as reliable as current earnings data.

**Return on Equity:** The ratio of Net Income to shareholders equity.

**Market Capitalization:** Market cap is the value of all a company's outstanding shares.

**Earnings per Share (EPS):** The portion of a company's profit allocated to each outstanding share of common stock.

**Active Share:** A measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index.

**Expense Ratio:** As per the Fund's January 31, 2022 Prospectus, the total annual Fund operating expenses as a percentage of the value of your investment, which incorporates indirect fees and expenses that the Fund incurs from investing in the shares of other mutual funds including money markets, otherwise known as Acquired Fund Fee Expenses or AFFE was 0.93%. Provident has contractually agreed to cap the ratio of expenses to average net assets at 1.00% through January 31, 2023.

Opinions expressed are subject to change, are not guaranteed and should not be considered investment advice or recommendations to buy or sell any security.

*Mutual Fund investing involves risk. Principal loss is possible. The Fund is non-diversified, meaning it may concentrate its assets in fewer individual holdings than a diversified fund. Therefore, the Fund is more exposed to individual stock volatility than a diversified fund. The Fund may invest in smaller and medium sized companies, which involve additional risk such as more limited liquidity and greater volatility. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. The Fund may invest in money market funds. An investment in a money market fund is neither insured nor guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the money market fund seeks to preserve the value of an investment at \$1.00 per share, it is possible to lose money by investing in the fund.*

**Fund holdings are subject to change and are not recommendations to buy or sell any security.**
